Two submissions behind this chapter

This reading guide identifies where John and [redacted] placed particular events in their own accounts. Page references use the PDF page numbers of the copies supplied for this chapter.

1. Consolidated Prior-Notice, Funding, Institutional-Overlap & Conflict-Review Chronology

October 2, 2026. 14 pages. Pages 1–2 trace the Colorado approach to counsel and John's July 14, 2023 follow-up about the 3M lawsuits. Pages 5–7 discuss an encounter [redacted] associate with Koski, Exum and Braun, their attorney-regulation inquiry, their report of identity theft and statements concerning a 3M settlement. The chronology identifies the date and attendance of the earlier meeting as questions requiring authentication.

Pages 10–14 distinguish evidence that agencies worked together from evidence that a particular person consulted a Wingo file. They identify records that could establish a payment, including an agreement, an instruction to disburse funds, a trust ledger and a cleared check or transfer.

2. Professional Investigative Packet

Formal Multi-Agency Request for Investigation, Evidence Preservation, Protection, and Controlled Evidence Handoff. 157 pages. Pages 2–6 give [redacted] account of a scheduled records meeting, identify dispatch incidents 2025-00203425 and 2025-00203694, and distinguish the CPCD administrative office, the Pikes Peak State College child-development site and Safe Passage.

Pages 19–22 set out disputes about access to the building, the timing of calls, the release of the child and the handling of campus body-camera records. [redacted] identify video, call audio, police reports, camera logs, correspondence and dispatch revisions they want preserved. Each item requested still requires its own custodian response or original file to establish what it contains.

Read beside the primary records

The website chapter places the dated mayoral emails, the July 2024 police recordings, the October 2025 meeting and dispatch records, the police-file excerpts and the investigator's later request beside the relevant events. The underlying submissions contain sensitive information about a child. This guide omits private case materials and contact details.
